Programme

0830 – 0930hrs	Registration
0930 – 1100hrs	<p>Opening Panel : Remodelling Growth</p> <p>Since the beginning of this century, the world has come to realize that the only meaningful way to grow and develop is one that is inclusive and sustainable. The present path of development is not sustainable in the longer term, even if the enormous potentials of the market and of technological innovation were realized. It is up to us to decide that the 21st century goes to history as the beginning of a new age, with a social and economic model based on “sustainability and inclusivity”.</p> <p>In response to this challenge and demand for new growth models, the CII-ITC Centre of Excellence for Sustainable Development is organising its 5th Sustainability Summit: Asia 2010 – REMODELLING GROWTH to understand the complex challenges which confront the modern world and to identify specific action points which must be planned to improve the prospects for sustainable and inclusive growth.</p> <p>Opening Remarks : Mr. Y C Deveshwar, Past President, CII, Chairman, CII-ITC Centre of Excellence for Sustainable Development Advisory Council and Chairman, ITC Limited</p> <p>Session Moderator : Mr. Tarun Das, Former Chief Mentor, Confederation of Indian Industry (CII)</p> <p>Panel:</p> <p>Chief Guest : Mr. Jairam Ramesh, Minister of State (Independent Charge) for Environment & Forests, Government of India</p> <p>Guest of Honour : Ms. Agatha Sangma, Minister of State for Rural Development, Government of India</p> <p>Mr. T N Ninan, Chairman & Editorial Director, Business Standard</p> <p>Mr. Y C Deveshwar, Past President, CII, Chairman, CII-ITC Centre of Excellence for Sustainable Development Advisory Council and Chairman, ITC Limited</p> <p style="text-align: right;">Report release</p> <p style="text-align: center;">Sustainable and Inclusive Innovation – Strategies for Tomorrow’s World</p>
1100 – 1130hrs	Networking tea / coffee break

<p>1130 – 1315hrs</p>	<p>Panel Discussion : Innovation-led Inclusive Growth</p> <p>For communities and for countries to thrive in the 21st Century, the spirit of innovation and discovery needs to be harnessed. Future challenges are impossible to predict, but it is certain that countries better able to innovate solutions and maneuver resource flows will be least susceptible to adversity. Innovation is itself the key to meeting some of the greatest challenges facing the world. It will be pivotal for instance, to reduce growth dependence on fossil fuels and natural resources, and provide access to basic needs and services to millions. Business and government must foster innovation that will lead to the technologies of the future that can be used by all, which will in turn create new industries, jobs, and skills. A strategic plan is clearly needed to capture the innovation opportunity.</p> <p>Session Moderator : Mr. Anil Padmanabhan, Deputy Managing Editor, Mint, HT Media Limited</p> <p>Panel :</p> <p>Dr. Helen Marquard, Executive Director, SEED Initiative, United Nations Environment Programme (UNEP)</p> <p>Mr. Marcel Engel, Managing Director, WBCSD Regional Network</p> <p>Dr. Rajneesh Dube, Joint Secretary, Ministry of Environment & Forests, Government of India</p> <p>Ms. Runa Khan, Founder & Executive Director, Friendship, Bangladesh</p> <p>Mr. Orlando Ayala, Chairman – Emerging Markets, Microsoft</p> <p>Ms. Tricia Morente, Head – Strategy & Marketing, LifeSpring Hospitals</p> <p>Q&A</p>
<p>1315 – 1415hrs</p>	<p>Lunch</p>

Programme

1415 – 1545hrs	<p>Panel Discussion : Clean Energy Mix Pragmatism</p> <p>Transition to clean energy mix with substantial changes in lifestyles is inevitable. In the medium-term a clean energy mix, with an increasing share of renewable energy resource looks most realistic. It seems pragmatic that a clean energy mix will be broader than it is today where non-renewables make up more than half of supplies for most large countries. Also, clean energy in total is likely to become more costly as compared to current prices. The transition to this wider diversity of clean energy sources will accelerate but probably be somewhat characterised by what regional resources are available. A realistic appraisal of the future encourages government to form appropriate policies, and business to take leadership in fast-tracking transition.</p> <p>Session Moderator : Mr. Rajat Gupta, Director, McKinsey & Company</p> <p>Panel :</p> <p>Mr. Chintan Shah, Vice President & Head, Strategic Business Development, Suzlon Energy Limited</p> <p>Mr. James Abraham, Managing Director & CEO, Sun Borne Energy</p> <p>Mr. Pankaj Sehgal, Managing Director, SUN Group</p> <p>Dr. Pronab Sen, Principal Adviser, Planning Commission, Government of India</p> <p>Mr. S K Sarangi, Executive Director, Indian Oil Corporation Limited</p> <p>Q&A</p>
1545 – 1615hrs	Networking tea / coffee break

1615 – 1800hrs

Plenary : With Accountability Comes Good Growth

Companies with inappropriate governance conduct can cause severe damage to global economies. There is no other option but for regulators to tighten controls and oversight of corporate governance. However, any amount of regulation is never sufficient, implying the need for accountability among companies. They cannot afford to ignore various social, environmental and cultural developments influencing their business. They need to understand and respond to changing stakeholder expectations of the role of business and have to communicate what they consider being realistic expectations of what business can and cannot achieve, and what they consider to be the responsibilities of others. It is important for companies to look at the aggregation of the triple bottom line and corporate governance.

Session Moderator : **Mr. Kris Gopalakrishnan**, CEO & Managing Director, Infosys Technologies Limited

Panel :

Dr. Alan Knight, Senior Fellow, AccountAbility

Mr. Jitesh Khosla, Additional Secetary, Government of India & OSD, Indian Institute of Corporate Affairs (IICA)

Ms. Leena Wokeck, Director, CSR Asia at Asian Institute of Technology

Ms. Katharina Tomoff, Vice President, GO GREEN, Deutsche Post – DHL

Q&A

Programme

1800 – 1830hrs	<p>Plenary : Promoting 3CS: An Innovative Learning Model</p> <p>The reality of Climate Change is clear and present. This will indeed impact businesses as we know it. Whilst it may not be apparent in the short term, being prepared for this eventuality for the mid to long term makes sense for corporations.</p> <p>A host of strategy options to deal with Climate Change have been provided in this innovative learning module designed for corporate decision makers.</p> <p>Aptly titled 3CS, this learning module comes in both instructor led and self e-learning available through the E-Academy of InWEnt.</p> <p>In this presentation, we will explore the e-learning module and its various components, including a brief live demo on how to navigate the tool.</p> <p>Session Moderator : Mr. Berthold Hoffman, Senior Project Manager, InWEnt – Capacity Building International</p> <p>Panel :</p> <p>Dr. Luiz Ramalho, Director, InWEnt – Capacity Building International</p> <p>Mr. Sreenivas Narayanan, Group Managing Director, Asia Society for Social Improvement & Sustainable Transformation (ASSIST)</p> <p>Ms. Seema Arora, Principal Counsellor & Head, CII-ITC Centre of Excellence for Sustainable Development</p>
1830 – 1900hrs	Tea / Coffee

1900 – 2030hrs

CII-ITC Sustainability Awards 2010 Presentation Ceremony

It is very important to recognize and follow the trends set by business leaders who have initiated activities and integrated practices into their business for the sustainable development of the country. The Sustainability Awards – instituted by CII-ITC Centre of Excellence for Sustainable Development in 2006 is a unique initiative to identify and recognize Indian business for their exemplary performance in economic, social and environmental dimensions. The Awards are also a knowledge-imparting tool by which the CII-ITC Centre of Excellence or Sustainable Development is building the capacity of Indian businesses to adapt sustainability practices. These prestigious Awards focus on the strong link between corporate reputation and customer trust, and feed into building brand value and public positioning of companies.

Opening remarks : **Mr. Y C Deveshwar**, Past President, CII, Chairman, CII-ITC Centre of Excellence for Sustainable Development Advisory Council and Chairman, ITC Limited
 Presentation Ceremony

Guest of Honour : **Mr. Arun Maira**, Member, Planning Commission, Government of India

Report release

 Concluding Remarks : **Dr. Subir V Gokarn**, Deputy Governor, Reserve Bank of India and Jury Member, CII-ITC Sustainability Awards

2030hrs

Cocktails & Dinner

Day 02, Wednesday, 1 December 2010

Programme

0930 – 1100hrs	<p>Panel Discussion : Water : Survival & Sustainability</p> <p>Water is a vital resource which is both scarce as well as in sufficiency depending on how one looks at it. Threat to human well-being, risk to business, and instability to geo-politics increase in varying proportions as water becomes scarcer. Importantly, business can play a vital role in protecting and improving water quality and availability by raising public awareness, reducing and recycling water within manufacturing operations, reducing the use of/impact on water in the use of products, forming partnerships with public sector organisations focused on pilot programs to improve water quality, and by integrating water as a critical and strategic issue in all business strategies. Water utilities have been called to improve service coverage and delivery, financial sustainability, and other aspects of their performance. Governments have to induce reforms in industrial, agricultural and municipal use.</p> <p>Session Moderator : Mr. Ravi Singh, CEO & Secretary General, WWF India</p> <p>Panel :</p> <p>Ms. Chhavi Rajawat, Sarpanch, Village Soda, Rajasthan</p> <p>Mr. Deepak Saksena, Director - Partnerships, Hindustan Uniliver</p> <p>Mr. Dhruv Vijai Singh, Secretary, Ministry of Water Resources, Government of India</p> <p>Mr. Navtez Bal, Partner, McKinsey & Company</p> <p>Mr. Niranjan Khatri, General Manager, WelcomEnviron Initiatives, ITC WelcomGroup</p> <p>Prof. S P Gautam, Chairman, Central Pollution Control Board, Ministry of Environment & Forests, Government of India</p> <p>Q&A</p>
1100 – 1130hrs	Networking tea / coffee break

<p>1130 – 1300hrs</p>	<p>Panel Discussion : Mainstreaming Responsible Mining</p> <p>Mining has been under scrutiny for quite some time. Many stakeholders have felt that the costs of mining outweigh its benefits, particularly in developing countries. The cost of ecological damage and the impact on local communities is huge, and so is the cost of correction. The scrutiny has mainly generated from a legacy of poor performance and unmet expectations in terms of its contribution to equitable growth and poverty reduction. Investments in the extractive industries could contribute to sustainable development if the benefits from mining are well-used. This session will articulate the conditions, success factors and strategies to maximize the contribution of the minerals sector to growth and development in developing countries.</p> <p>Session Moderator : Dr. Nik Senapati, Managing Director, Rio Tinto India</p> <p>Panel :</p> <p>Ms. Neena Singh, Partner, ERM India Private Limited</p> <p>Ms. Pamela Ruppin, Principal Adviser – HSE Strategic Risk, Rio Tinto</p> <p>Dr. Arun Kashyap, Senior Policy Advisor, Private Sector Division, United Nations Development Programme (UNDP)</p> <p>Prof. Gurdeep Singh, Professor & Head of Department, Centre for Mining Environment, Indian School of Mining</p> <p>Q&A</p>
<p>1300 – 1400hrs</p>	<p>Networking lunch</p>

Programme

1400 – 1545hrs	<h2>Plenary : Making Cities Smart</h2> <p>In the context of economic and technological changes caused by the globalisation and the integration process, cities globally face the challenge of combining competitiveness and sustainable urban development simultaneously. Very evidently, this challenge is likely to have an impact on issues of urbanisation such as housing, economy, culture, social and environmental conditions. Smart Cities are touted as the solution. They are supposed to contain intelligent networks, sustainable buildings, and mobility systems. Companies, research institutions and governments are preparing blueprints for smart cities that focus on intelligent computing infrastructures with cutting-edge advances in cyber-physical systems, internet services and other frontiers of innovation to support the cities of tomorrow. This session will showcase some of these efforts and explore the opportunity.</p> <p>Session Moderator: Mr. Arun Nanda, Chairman, CII – Western Region and Director, Mahindra & Mahindra Limited</p> <p>Panel:</p> <p>Mr. Amitabh Kant, CEO & Managing Director, Delhi Mumbai Industrial Corridor Development Corporation (DMICDC)</p> <p>Ms. Molly Webb, Head – Smart Technology, The Climate Group</p> <p>Mr. Scot Wrighton, City Manager, Lavasa Corporation Limited</p> <p>Q&A</p> <p>Tea / Coffee</p>
